

All kinds of AC wires and all kinds of DC wires

Our company (<https://www.bitstrong.co.jp>) is a sales company in Japan, and we have been selling good products from many domestic manufacturers. We are looking for the following products that can be distributed in Japan, and if you are willing to supply or export to Japan, please send a PDF of the product introduction and company introduction to my email partner_logi@bitstrong.com. My (Men Hongtao) WeChat ID is med-ind1189, welcome to use WeChat to further communicate with WeChat (it is best to be a manufacturer/non-direct manufacturer who is willing to cultivate the Japanese market, sorry to not talk).

The prerequisite for AC wire to be sold in Japan is that it has Japanese PSE certification. Our top priority is to cooperate with manufacturers with Japanese PSE. DC wires can be without PSE.

is sent to partner_logi@bitstrong.com (also welcome to use WeChat (ID: **med-ind1189**) for further communication)

There are manufacturers of "various AC cables, various DC wires/wiring harnesses, flat/SATA cables, etc.", and we also customize them, but customers who are not familiar with our products need to start with standard products first. In Japan, we do e-commerce and retail for factories, companies, and business people. We are interested in retail sales for factory technicians and "small products that are relatively large/large in the market" (e.g., small coils of electronic wires, arranged wires, parallel wires, etc.).

Do you have any retailable products that are relatively stereotyped/conventional and have a certain amount of inventory on a daily basis (at least willing to produce some in transit when producing large quantities)? If so, please send a "list of retail products"

We focus on finding relatively standard products that we can sell on marketplaces. Customization is also done, but on the basis of such standard products.
