

Look for the Pet/Livestock thermometer

Our company (<https://www.bitstrong.co.jp>) is a sales company in Japan, and we have been selling good products from many domestic manufacturers. We are looking for the following products that can be distributed in Japan, and if you are willing to supply or export to Japan, please send a PDF of the product introduction and company introduction to partner_logi@bitstrong.co.jp e-mail. Our WeChat ID is **med-ind1189** (door Hongtao), welcome to use WeChat for further communication. It is best to have a manufacturer who is willing to cultivate the Japanese market (sorry for not talking about non-direct manufacturers).

Thermometers for livestock (pigs, cows, large animals in zoos/aquariums)

Pet thermometers (dogs, cats)

Like a mercury thermometer, a digital thermometer that can be inserted into the anus as shown in the picture. Good water resistance is required.

You also need such a coat, put on a coat to measure your temperature, throw away the coat after the measurement, and keep the thermometer clean all the time.

We only deal with manufacturers, and we expect them to have a medical manufacturer registration in Japan (not a product registration).

Below are the products we are currently selling for pet hospitals.

We plan to increase the variety of thermometers from pets to large animals (pigs, cows, zoos/aquariums), and seek more cost-effective/more distinctive/competitive products to make a relatively complete animal thermometer product chain.

If you are willing to cooperate, please follow the steps below to provide information (you need to discuss with the person in charge of the Japanese with a complete set of complete materials to advance, and you cannot advance without complete information)
