Liquor checker, Alcohol measuring instrument

Here are the breathalyzers we are currently selling

<https://www.bitstrong.co.jp/store/category/item/alcohol-detector/>

We have been selling for almost 2 years, and according to the changes in the market, we are currently focusing on the following models (one of which can be discussed):

1. A certain number of detection records can be imported into PC or mobile phone models, and even if the detection result is 0, it is expected to have a record (it cannot be omitted because it is 0)
2. Display the long-life models that can be used for 2/3 years or more, such as 5000 times
3. Low priced models used for bidding (functions may be limited but accuracy/quality cannot be poor)
4. Mouthpiece type, in addition to dedicated Mouthpieces, can also be replaced by "regular straws"
5. Can distinguish between "playing with a bear without blowing" and "blowing/testing but resulting in 0 due to not drinking" models (the former should be incorrect, the latter is normal but the result is 0)
6. Users can change the model of the sensor. Companies that are willing to

cooperate should provide information according to the following steps (promotion requires a complete set of information to discuss with the person in charge of the Japanese, and it is impossible to advance without complete information)

Trouble to put your:

1. The company's official website and Chinese company name
2. Your **1688**, **made-in-China** and **alibaba** international sites and other major store url.

The above three types of information are basic information, and without one of them, they cannot be handed over to our person in charge for analysis, so they cannot enter the next step.

Our company (<https://www.bitstrong.co.jp>) is a sales company in Japan, and we have been selling good products from many domestic manufacturers. It is best to have a manufacturer like the one below who is willing to cultivate the Japanese market (sorry for not talking about non-direct manufacturers).
